

**PUBLIC NOTICE**  
For  
Air Quality Operating Permit  
for Roswell Compressor Station No9 of Transwestern Pipeline Company (Air Quality)

Transwestern Pipeline Company (Air Quality) at 6381 North Main Street; Roswell, NM 88201 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Roswell Compressor Station No9. The owner of this plant is Transwestern Pipeline Company. The exact location of the facility is at latitude 33 deg, 30 min, 22 sec and longitude -104 deg, 30 min, 59.7 sec. To aid in locating this facility, the approximate location is 5 miles north of Roswell, New Mexico 88201 in Chaves County. This application file has been assigned an Operating Permit Number P154-R3M1 and TEMPO Agency Interest ID No. 10.

Previously, the facility received an air quality construction permit and is in operation.

This facility is a compressor station. Pipeline natural gas from a gathering system enters the facility via a distribution system that feeds two natural gas fired engines. After compression this gas is discharged into another pipeline.

This operating permit application is for a permit modification. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporating two soil vapor extractors ("SVE") permitted in NSR Permits 1776 and 1777, which are permitted for 8,760 hours of operation per year, into the Title V permit and revert the Hazardous Air Pollutant (HAP) rates back to the rates of the Title V permit prior to Permit No. 154-R3.

The estimated maximum air pollutant emissions to the atmosphere from this plant after the requested operating permit is granted are as follows. Parentheses note changes in emissions from the previous operating permit action; emissions are expressed in tons per year (tpy). Nitrogen Oxides (NO<sub>x</sub>) at 1122.6 tpy (+0.6) and Carbon Monoxide (CO) at 118.9 tpy (+0.4); Volatile Organic Compounds (VOC) at 87.3 tpy (+3.8); Sulfur Dioxide (SO<sub>2</sub>) at 0.05 tpy (no change); Particulate Matter 10 microns or less (PM<sub>10</sub>) at 2.9 tpy (no change), and Particulate Matter 2.5 microns or less (PM<sub>2.5</sub>) at 2.9 tpy (no change); and greenhouse gas (CO<sub>2</sub>e) (> or <) 75,000 tpy

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance.

The NMED has made a preliminary determination that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 7, 61, 70, 71, 73; 40 CFR 50; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before September 8, 2015.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P154-R3M1 by contacting Joseph Kimbrell at the New Mexico Environment Department, Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816. The Department contact in Santa Fe is Joseph Kimbrell at 505-476-4347.

Este es un aviso de la Agencia de Calidad de Aire del Departamento de Medio Ambiente de Nuevo México, acerca de las emisiones producidas por un establecimiento en esta área. Si usted desea información en español, por favor de comunicarse con la oficina de Calidad de Aire al teléfono 505-476-5557.
